WORK EXPERIENCE

Software Engineer II — Toast

Mar 2024 – Present

Payments Experience Team | Remote

- Own and deliver payment features across Toast's Android POS application serving **over 100,000 restaurants**, contributing to a product processing **billions in gross annual payment volume**.
- Drove modularization efforts to break apart monolithic "god modules" into a cleaner, more maintainable architecture, **reducing build times from 15+ minutes to less than 3 minutes** and improving developer velocity across the team.
- Helped reduce Espresso test flakiness to **~1%** and improve PayX code coverage to **over 75%**, significantly increasing release confidence and reducing regression risk.
- Built and maintained Claude-powered automation skills to streamline daily and weekly team workflows, reducing manual overhead for recurring engineering tasks.
- Collaborate cross-functionally with product, design, and backend teams to scope, build, and ship user-facing improvements to the checkout and payment experience.
- **Tech:** Kotlin, Android SDK, Coroutines, XML, Espresso, JUnit, Claude, Jenkins, Git, Jira

Software Engineer I — Toast

Dec 2021 – Mar 2024

Payments Experience Team | Remote

- Built and shipped new payment features within the Toast POS system, working across a large legacy-to-modern Kotlin codebase with cross-team dependencies.
- Diagnosed and resolved production bugs impacting merchant checkout flows, reducing payment-related support escalations.
- Contributed to sprint planning and backlog refinement, collaborating with product and design to prioritize iterative improvements to the payment UX.
- **Promoted to Software Engineer II** based on consistent delivery, code quality, and cross-team collaboration.
- **Tech:** Kotlin, Java, Android SDK, XML, Jenkins, Git, Jira

Software Engineer — Eretailing Associates LLC

May 2019 – Dec 2021

E-Commerce Team | Columbus, OH

- Designed and built an in-house Android application for inventory management, improving order throughput and accuracy for the warehouse team.
- Built web-based reporting dashboards and optimized backend processes supporting high-volume e-commerce fulfillment.
- **Tech:** Java, SQL, AWS, Perl, HTML/CSS, Git

PROJECTS

TopCheese — Live NHL Shots & Goals Tracker

Mar 2026 – Present

Released on the App Store | topcheeseapp.com

- Built and launched a free iOS app that tracks live NHL shots and goals with a real-time visual heat-level system. **126 users and growing**.
- Partnered with PuckPedia to integrate accurate, real-time NHL lineup data, improving data reliability and user trust in live game tracking.
- Engineered the full stack as a solo developer — React Native (TypeScript) + Expo frontend, Node.js / Fastify / Redis backend — with caching and cron jobs to handle NHL API rate limits and keep live data fast.
- Owned everything end-to-end: engineering, UI/UX design, App Store optimization, marketing, and copywriting.

TECHNICAL SKILLS

Languages: Kotlin, JavaScript, TypeScript, SQL

Android: Android SDK, Coroutines, Flow, Espresso, JUnit, XML

Backend: Node.js, Fastify, Redis

Tools: Git, Jenkins, Claude Code, Jira, Figma

EDUCATION

M.S. in Information Studies — Trine University

Jun 2023 – May 2024

B.S. in Computer and Information Sciences — The Ohio State University

Aug 2015 – May 2020
